W. McGregor & Co. In the play a young man who has complay a young man who has comunintentional murder and who has once been condemned is having a second trial. The assistant district-attorney, who is prosecuting the case, is the prisoner's rival in love and is therefore pressing the charges with all the power and skill at his command, "Jack" Brookfield, the central figure of the drama, appreciates the true circumstances of the case and is eager to secure the release lights out about half past eight o'clock. of the unfortunate young man, who is the son of the woman he loves.

"Brookfield," through the instructions of a justice of the supreme court, has come to understand the power of mental telepathy and thought transferrence. He knows that the prosecuting attorney has himself been guilty of planning a murder in the past, though the crime was actually carried out by another man. At the last moment, while the jury is out, "Brookfield" gives these facts to a newspaper, regardless of all personal risk, on the theory that, though the jurymen cannot read the paper, the news will spread like wild-fire throughout the state and the minds of the jurymen must necessarily respond to this great invisible force of dynamic thought sociation will be held here Oct. 27, turned against the prosecutor.
